SUBJECT INDEX

Alloys
electrochemical and surface characterization of the passive film on Fe–Cr–Pd alloys, 325
electrodeposition of alloys: XXI. Electrodeposition of Pb–Sn alloys and their X-ray structure, 299

Chemical vapour-deposition
chemically vapour-deposition hard coatings: applications and selection guidelines, 267

Electrochemical characterization
electrochemical and surface characterization of the passive film on Fe–Cr–Pd alloys, 325
Electrodeposition
electrodeposition of alloys: XXI. Electrodeposition of Pb–Sn alloys and their X-ray strcuture, 299
pulse plating effects in nickel electrodeposition, 273
Electron diffraction
electron diffraction study of vacuum-deposited In_2Te_3 thin films, 353

Hard coatings
chemically vapour-deposited hard coatings: applications and selection guidelines, 267

Laser surface hardening
study on residual stresses in laser surface hardening of a medium carbon steel, 311

Metals
surface effects in micromachining of metals and alloys, 281
Micromachining
surface effects in micromachining of metals and alloys, 281

Microstructure
microstructure and composition of plasma-nitrided Ti–6Al–4V layers, 339

Nickel
pulse plating effects in nickel electrodeposition, 289

Plasma-nitrided layers
microstrucutre and composition of plasma-nitrided Ti–6Al–4V layers, 339
Pulse plating
pulse plating effects in nickel electrodeposition, 289

Steel
study on residual stresses in laser surface hardening of a medium carbon steel, 311
Surface characterization
electrochemical and surface characterization of the passive film on Fe–Cr–Pd alloys, 325
Surface effects
surface effects in micromachining of metals and alloys, 281

Thermal vapour deposition
chemically vapour-deposited hard coatings: applications and selection guidelines, 267

Vacuum-deposition
electron diffraction study of vacuum-deposited In_2Te_3 thin films, 353

X-ray structure
electrodeposition of alloys: XXI. Electrodeposition of Pb–Sn alloys and their X-ray structure, 299
